

## Self-Structured Platform Elevators

## Home (or) Villa Buildings Existing Low-Rise Buildings

### Home Elevators

Experience effortless installation in any location, as **no pit is required**. This model offers versatile applications, featuring a choice between **Hydraulic or Screw drive systems**. It ensures both indoor and outdoor safety while seamlessly meeting your needs. The installation is a breeze, with the elevator easily resting on the floor, eliminating the need for additional construction. The outdoor variant is built to withstand extreme weather conditions.

Ideal for use in a variety of settings, including schools, temples, police stations, rehabilitation center, public institutions, private health facilities, and training center. NEXT POWER Home Elevators are manufactured **in accordance with the 2006/42/EC regulations and come with a CE certificate**, guaranteeing the highest standards of user and environmental safety.

Elevate your living space with NEXT POWER Home Elevator's design options, offering a sophisticated approach to convenience. This indirect-acting hydraulic lift is suitable for vertical transportation both within and outside multi-story residences.
